

NWAudit-Cage

This module is designed to make your Cage Operations run smoother. It has two major functions: Cashier and Manuals.

Cashier

First, you scan gaming documents (tickets, jackpot fill/credits, table fill/credits, scrip and coupons). The system generates a tape total by document type, shift and gaming date.

The software also gives you the ability to identify and correct unredeemed tickets.

Manuals

This is your electronic answer to WIZ machines. It's your back up in the event your host system is down. It even works when your network doesn't.

It creates all the manual gaming documents you need, complete with your design, logo and water marked paper stock. The system populates fields for you so it is a fast solution as well.

Manuals can interface with NWAudit-Gaming and your host system to upload the manual data automatically, saving you even more time and reducing transcription errors to zero.

If you'd like a more detailed presentation or a product demo, please give us a call.
