

# NWAudit-Gaming

If you need to audit single and multiple part gaming forms, this software is for you. If you are conducting audits manually, we can cut the time in half.

Operation is a simple process. Documents are scanned in the Cage by category and a tape total is generated. You then balance by gaming date. Multiple parts are matched and married. Once a separate audit is complete, the images are stored on electronic media (you don't have to keep the paper).

Depending on your operations, the system can also be configured to perform the entire process in Auditing.

System generated reports are complete with auditing and history structures. These can be exported to Excel and PDF formats as well.

If you'd like a more detailed presentation or a product demo, please give us a call.
