

# NWAudit-Soft Count Pro

This software works in conjunction with a high speed sorting device for tickets and cash. It calculates tape totals for you filtered by box, machine and batch. It addresses issues unique to the types of drops on your casino floor: slot, kiosk and table games.

In addition to tape totals, you have the ability to export totals for tickets and cash to your host system. You can balance by box or batched areas. The system then generates a balance transfer report from Soft Count to the Vault/Cage area.

For Kiosk drops, you can identify unredeemed ticket information instantly and view it as a full screen image.

If you'd like a more detailed presentation or a product demo, please give us a call.
